

# Nature's beauty

Nature is the most beautiful and useful gift of nature. It is having all colours in the world. If anyone want to be refreshed then there is no need to spend money and go to cinema etc just look the sunset in the evening or go for a walk in evening or morning. The morning is the most beautiful part of our nature. Nature is having birds, animals, stars, sun, flower etc all these are not only beautiful but useful also. All of these are having its own uses even the ~~natural~~ dangerous beasts are also useful. So please save nature, save your selves.
